ATERIAL SAFETY DAT	A SHEET Jyondelibas Gen. Variant: SDS US				
rsion 1.1 Revision Date					
In case of eve contact	. Eluch avec thereughly with water for several minutes and a				
In case of eye contact	: Flush eyes thoroughly with water for several minutes and s medical attention if discomfort persists.				
If swallowed	: Adverse health effects due to ingestion are not anticipated.				
CTION 5. FIRE-FIGHTING MEA	SURES				
Flammable properties					
Autoignition temperature	: > 572 °F (300 °C)				
Lower explosion limit	: Not applicable.				
Upper explosion limit	: Not applicable.				
Fire fighting					
Suitable extinguishing media	 SMALL FIRE: Use dry chemical, CO2, water spray or regul foam LARGE FIRE: Use water spray, water fog or foam. DO NO use straight streams 				
Unsuitable extinguishing media	: High volume water jet				
Further information	 Not normally combustible, but will decompose under fire conditions. Fight fire from maximum distance or use unmanned hose holders or monitor nozzles. Heat from fire may melt, decompose polymer, and generate flammable vapors. Move containers from fire area if you can do it without risk. Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank. Always stay away from tanks engulfed in fire. Cool containers with flooding quantities of water until well a fire is out. 				
Protective equipment and pr	ecautions for firefighters				
Specific hazards during fire fighting	 Polyolefin dust particles in the atmosphere are combustible and may be explosive. Keep away from heat and sources of ignition. 				
Special protective equipment for fire-fighters	: Wear an approved positive pressure self-contained breathing apparatus and firefighter turnout gear.				
CTION 6. ACCIDENTAL RELE	ASE MEASURES				
Personal precautions	: Equip responders with proper protection. Potential dust explosion hazard. Avoid generating dust.

MATERIAL SAFETY DATA SHEET

Metocene MF650Y

Version 1.1 Revision Date 12/06/2012

Print Date 01/16/2013

Gen. Variant: SDS_US MSDS No.: BE8379

lyondellbasell

Materials that can be formed when handling this product: non- specified (inert or nuisance) dust	TWA	10 mg/m3	2005	US (ACGIH)
	TWA	3 mg/m3	2005	US (ACGIH)
Materials that can be formed when handling this product: non- specified (inert or nuisance) dust	TWA	15 mg/m3	2005	US (OSHA)
	TWA	5 mg/m3	2005	US (OSHA)

Engineering measures

Engineering measures	 Engineering controls, preferably enclosed systems, should be used whenever feasible to maintain exposures below acceptable criteria. When such controls are not feasible, or sufficient to achieve full conformance, other engineering controls such as local exhaust ventilation should be used. It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).
Personal protective equipn	nent
Eye protection	: Dust service goggles should be worn to prevent mechanical injury or other irritation to eyes due to airborne particles which may result from handling this product.
Hand protection	: Wear heat protective gloves and clothing if there is a potential for contact with heated material.
Skin and body protection	: Wear suitable protective clothing.
	5/11

	Gen. Variant: SDS_US
Ietocene MF650Y ersion 1.1 Revision Da	ate 12/06/2012 Print Date 01/16/2013 MSDS No.: BE83
Respiratory protection	 Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use appropriate respiratory protection where atmosphere exceeds recommended limits.
Hygiene measures	 Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use. Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Take off contaminated clothing and wash before reuse.
ECTION 9. PHYSICAL AND C	HEMICAL PROPERTIES
Appearance	
Physical state Color	: solid : Translucent to white
Odor	: Faint, mild hydrocarbon odor.
Safety data	
Lower explosion limit	: Not applicable.
Upper explosion limit	: Not applicable.
Flammability (solid, gas)	: Not Classified. Polymer will burn but does not easily ignite.
	: No Data Available.
Oxidizing properties	: > 572 °F (300 °C)
Oxidizing properties Autoignition temperature	
	: Not applicable.
Autoignition temperature	 Not applicable. 122 - 284 °F (50 - 140 °C)
Autoignition temperature	
Autoignition temperature pH Freezing point	: 122 - 284 °F (50 - 140 °C)
Autoignition temperature pH Freezing point Boiling point	: 122 - 284 °F (50 - 140 °C) : Not applicable.
Autoignition temperature pH Freezing point Boiling point Vapor pressure	 122 - 284 °F (50 - 140 °C) Not applicable. Not applicable.

	polypropylene (molecular weight of 800) for two years.			
Target Organ Systemic T	oxicant - Repeated exposure			
: No adverse health effects were noted on the digestive syster of test animals when fed up to 20% of an oligomeric polypropylene (molecular weight of 800) for two years.				
Toxicology Assessment				
CMR effects	: Carcinogenicity: Not listed by IARC, NTP, OSHA or EPA.			
12. ECOLOGICAL INFORMAT	ION			
Elimination information (persistence and degradability)			
Bioaccumulation	: This material is not expected to bioaccumulate.			
Additional advice Environmental fate and pathways	: This material is not volatile and insoluble in water.			
Biodegradability	: Not expected to be biodegradable.			
Further information on e	cology			
Additional ecological information	: Ecotoxicity is expected to be minimal based on the low water solubility of polymers.			
	No data available on this product. However, birds, fish and other wildlife may eat pellets which may obstruct their intestinal tracts.			
SECTION 13. DISPOSAL CON	ISIDERATIONS			
Further information	: All recovered material should be packaged, labeled, transported and disposed of or reclaimed in conformance with applicable laws and regulations and in conformance with good engineering practices. Reclaim where possible. Recycle if possible.			
SECTION 14. TRANSPORT IN	FORMATION			
Proper shipping POLY name	PROPYLENE, OTHER THAN LIQUID, not regulated
